Zero Dollar Copay Preventive Medication List
White Paper**

ACA-EHB: Zero Dollar Copay Preventive Medication List

The Patient Protection and Affordable Care Act (ACA) is the health care reform law passed by Congress and signed by President Obama in 2010; it requires that new and non-grandfathered health plans cover preventive essential health benefits (EHB) without charging a copayment, coinsurance, or deductible. Plans that meet the definition of a “grandfathered” plan are not subject to EHB requirements. EHBs include a variety of preventative services and medications that are outlined by the United States Preventive Services Task Force (USPSTF) recommendations with an A or B rating, recommendations from the Advisory Committee on Immunization Practices (ACIP), and guidelines supported by the Health Resources and Services Administration (HRSA) for pediatrics and women. Based on the recommendations of USPSTF, HRSA, and the Centers for Disease Control and Prevention (CDC)/ACIP, MedImpact has identified medications to be covered under the pharmacy benefit.

USPSTF, HRSA, and ACIP/CDC recommendation updates can occur at any time and health plans have specified timelines to implement these recommendations in compliance with federal law. New recommendations will be required to be covered without cost-sharing starting with the plan year (or in the individual market, the policy year) that begins on or after the date that is one year after the date the recommendation is issued. State specific requirements may vary. Implementation dates are vetted internally with MedImpact regulatory compliance partners, and MedImpact will continuously monitor for ACA-related guidance and updates to ensure compliance with all regulations.

Regarding the inclusion of branded and generic products on the EHB Zero Dollar Copay List, plans may cover a generic drug without cost-sharing and impose cost-sharing for equivalent branded drugs; however, a plan or issuer must accommodate any individual for whom the generic drug would be medically inappropriate (as determined by the individual’s health care provider) with a mechanism for waiving the otherwise applicable cost-sharing for the branded or non-preferred brand version.

Definitions and Abbreviations

Low-moderate intensity generic and certain brand statins	Age 40-75 years No concurrent use of secondary prevention medications [e.g., <i>Aggrenox (aspirin/dipyridamole), Plavix (clopidogrel), dipyridamole, nitroglycerin (oral, sublingual, transdermal, translingual), Effient (prasugrel), Brilinta (ticagrelor), ticlopidine, Zontivity (vorapaxar)</i>] Quantity limited to statin dosages at low-to-moderate intensity Prior Authorization: Flolipid PA for patients unable to use tablet simvastatin; SSB/MSB PA for patients unable to use generics Step Therapy: (Altprev, Lescol, Lescol XL, and Zypitamag)	Generics and one SSB (Livalo) Low-moderate intensity daily dosing: <ul style="list-style-type: none"> • Crestor (rosuvastatin) 5-10 mg • Lescol (fluvastatin) 20-80 mg (40 mg twice daily) • Lescol XL (fluvastatin) 80 mg • Lipitor (atorvastatin) 10-20 mg • Livalo (pitavastatin calcium) 1-4 mg • Mevacor (lovastatin) 10-40 mg • Pravachol (pravastatin) 10-80 mg • Zocor (simvastatin) 5-40 mg

Optional ACA-EHB Zero Dollar Copay Tables

Additional product categories, such as vaccines and smoking cessation agents, may be covered by an in-network provider on the medical benefit, pharmacy benefit, or both, as determined by the plan. MedImpact has developed optional tables for clients who elect to cover these agents on the pharmacy benefit. Immunizations for routine use, or ACIPs recommended immunizations for all persons may

White Paper

include the vaccines listed on the optional table. Except for the flu vaccine, which may not coincide with a “well child” visit, most vaccines for children age 18 years or younger are covered via the plan’s medical benefit, frequently administered at the routine “well child” visits. As adults do not typically visit the provider’s office as frequently or routinely as children, routine items such as tetanus, recommended for all adults, is provided on the optional vaccine table. Certain vaccines are recommended for adults on the basis of age, lifestyle, health conditions, job, international travel, and previous vaccines received; as some conditions and/or risk factors warrant evaluation for immunocompromising states, chronic conditions, or asplenia, these vaccines are left to the determination of the provider.

Vaccine	Edit
Optional Vaccines – Influenza Table	
Influenza vaccines	Age ≥ 18 years for Flublok, ≥ 65 for Fluzone High Dose and Fluad, Quantity limit of 1 dose per 180 days
Optional Vaccines – Other Table	
Human papillomavirus (Gardasil 9)	Age 9-26 years, Quantity limit of 3 doses per 365 days
Hepatitis A (Vaqta, Havrix)	Age ≥18 years, Quantity limit of 2 doses per 365 days
Hepatitis B	Age ≥18 years, Quantity limit of 3 doses per 365 days (Engerix-B Adult; Recombivax HB); 2 doses per 365 days (Heplisav-B)
Hepatitis B/Hepatitis A combo (TwinRix)	Age ≥18 years, Quantity limit of 4 doses per 365 days
Measles, mumps, rubella (MMR)	Age ≥18 years, Quantity limit of 2 doses per 365 days
Meningococcal serogroup B vaccine (Bexsero, Trumenba)	Age 10-25 years, Quantity limit of 2 doses per 365 days (Bexsero); 3 doses per 365 days (Trumenba)
Meningococcal quadrivalent conjugate [MenACWY (Menactra, Menveo, MenQuadfi)]	Age 11-23 years, Quantity limit of 1 dose per 365 days
Pneumococcal polysaccharide (Pneumovax 23) Pneumococcal 15-valent conjugate (Vaxneuvance) Pneumococcal 20-valent conjugate (Prevnar 20)	Age ≥65 years, Quantity limit of 1 dose per 365 days
Tetanus, diphtheria, pertussis (Tdap) Tetanus, diphtheria (Td)	Age ≥ 18 years, Quantity limit of 1 dose per 365 days
Varicella	Age ≥ 18 years, Quantity limit of 2 doses per 365 days
Zoster vaccine, recombinant (Shingrix)	Age ≥ 50 years, Quantity limit of 2 doses per 365 days
